

Complete Powder Coating Solutions for Fan Manufacturing Industry

Industrial Ovens, Powder Coating Booths & Conveyor Systems

Common Challenges in Fan Manufacturing

Uneven curing & weak coating finish

High fuel consumption

Color inconsistency

Manual handling & production slowdown

What We Manufacture

Industrial Curing / Baking Ovens

Uniform heat, fuel-efficient, durable coating

Powder Coating Booths

Clean airflow, better adhesion, less powder waste

Conveyor Systems

Smooth material flow, reduced manual handling

Customized Plant Solutions

Designed as per fan factory layout & capacity

Our Products & Installations

Complete Powder Coating Setup
Integrated booth & recovery system

Industrial Curing Oven
Precision temperature control

Conveyor System
Automated material handling

Control Panel
Digital temperature management

Powder Coating Unit
Professional powder application

Powder Coating Unit
High-efficiency coating system

Powder Coating Unit
Industrial-grade equipment

Powder Coating Unit
Compact & versatile design

Why Fan Manufacturers Trust M-E-C

Engineered for Pakistani climate & factory conditions

Energy-efficient & cost-effective designs

Consistent quality & long machine life

Local manufacturing with technical support

Our Objective

Our goal is not just to supply machinery, but to **improve coating quality, reduce fuel cost, and ensure reliable production.**
